### Reference letter

“Mielewczyk” company is a leading producer of poultry meat and poultry convenience food. Our plants are located in the beautiful land of Polish Kashubia. We have been present on the market for over twenty five years. We continue to thrive and numerous technologies we possess make us the market leader.

We comply with the HACCP, GMP and GHP principles and meet all BRC and IFS standards. Poultry comes exclusively from certified Polish farms, where humane breeding conditions exist. Our products have been subjected to regular microbiological and chemical testing. Our production lines comprise innovative, high standard equipment, and packing in a modified atmosphere helps to extend the shelf life of the meal without losing its natural taste.

We started cooperation with the D-SAN Solutions Ltd. (subsidiary company of ALVAR group from Iceland) in 2019. It is a modern disinfection system that allows for effective and safe disinfection of production areas. D-SAN also provides professional technical support, guaranteeing failure-free operation of the system

We recommend D-SAN Solutions company for cooperation.
