Reference letter

The SEKO SA Company is a leading Polish fish processing enterprise. The company was founded in 1992 at the "Dalmor" Fishing Port in Gdynia, and was moved to Chojnice in 1995. The modern plant of the company currently has an area of 16 thousand m².

SEKO SA offers over 200 product items in 17 categories. These are marinades, frozen food, pastas, salads and preserves prepared mainly on the basis of herring and mackerel imported from certified fisheries of Iceland, Norway, Denmark, Germany and Canada. SEKO has a quality and food safety management system confirmed by numerous certificates. SEKO SA products are available in retail chains and warehouses throughout the country, as well as on foreign markets, including Germany, the Czech Republic, Slovakia, Ireland, England, Romania, Italy, France and Lithuania.

In 2018, after a trial period, our company started cooperation with D-SAN Solutions Ltd. (subsidiary company of ALVAR Ltd.) and is currently in the production plant in Chojnice, using automatic D-SAN system for disinfection.

We confirm the effectiveness of the system in maintaining a high standard of hygiene. We recommend D-SAN Solutions Ltd. to cooperate as a responsible partner with particular attention to after-sales service.

Sincerely,

DYREKTOR ZAKŁADU

Dariusz Żmija
