

Reference letter

The company SuperDrob S.A. is one of the leaders in the poultry industry in Poland and a leading exporter of poultry meat products, offering products from the highest quality poultry on the Polish market and European Union countries.

SuperDrob S.A. has been working with a global agri-food brand from Thailand – Charoen Pokphand Foods (CP Foods) – since 2017. Our partner is a leading meat producer, processor, and exporter in Southeast Asia.

Out of concern for food safety and the highest quality of the production process, we follow the requirements of the HACCP system, which allows us to anticipate and eliminate hazards during food production. 100% safety of our products is confirmed by the international BRC Global Standard-Food certificate.

Our priorities are top quality and safety. The whole production chain is in our experienced hands, so we can guarantee the highest standards at every stage – from the egg to the finished product.

We are constantly expanding our product range. Our goal is to set trends in the poultry-products market, so we invest in our employees and innovative technology.

Starting from December of 2016, we have been cooperating with the company D-SAN SOLUTIONS Ltd. (subsidiary company of ALVAR Ltd.). Currently, our Group uses seven extensive D-SAN disinfection systems in poultry plants in Karczew, Lublin, Goleniów and Łódź. We confirm the high effectiveness of installed systems in terms of maintaining microbiological purity, and their efficiency in terms of savings in water consumption and chemical preparations.
